# **TOOLBUS Interface for ARIS and ProVision**

**Version 1.10**

## **Data Sheet**

(effective May 2011)

The TOOLBUS Interface for ARIS and ProVision enables the migration of Workflow and Process Models from Metastorm ProVision to Event-Process-Chain (EPC) models, Value-Added Chain models and Function Trees for ARIS Business Architect, and vice versa.

The diagram layout of the process models is maintained in both directions.

### **Conversion Process:**

For the conversion of process models from ProVision to ARIS Business Architect the ProVision CIF (XML) export files are parsed, and converted to XML (AML) import files for ARIS Business Architect.

In order to convert process models from ARIS Business Architect to ProVision the ARIS Group must be exported to a XML file (AML file). The ARIS XML export file is converted to a CIF (XML) import file for ProVision.

### **Platform:**

The TOOLBUS Interface for ARIS and ProVision requires Microsoft Windows 2000/XP/Vista/7. The interface supports ARIS Business Architect 7.0, 7.1 and 7.2, and Metastorm ProVision versions 6.0, 6.1 and 6.2.
