TOOLBUS Interface for ARIS and Rational Rose

Version 8

Data Sheet

(effective July 2009)

The **TOOLBUS Interface for ARIS and Rational Rose** enables the conversion of UML Diagrams from **IBM Rational Rose** to **ARIS Business Architect**, **ARIS UML Designer** and the **ARIS Toolset**.

Rational Rose UML diagrams supported for the conversion to **ARIS Business Architect** and **ARIS UML Designer**:

- UML Class Diagrams
- UML Use Case Diagrams
- UML Sequence Diagrams
- UML Activity Diagrams
- UML Statechart Diagrams
- UML Collaboration Diagrams
- UML Component Diagrams
- UML Packages

Rational Rose UML diagrams supported for conversion to the **ARIS Toolset**:

- UML Class Diagrams
- UML Class Description Diagrams
- UML Use Case Diagrams
- UML Component Diagrams

The UML diagrams and the UML objects are converted from Rational Rose to ARIS with their properties and documentation, and the layout of the UML Diagrams is maintained

Interface Technology: The TOOLBUS interface reads .MDL files using the Rational Rose Extensibility Interface (REI), and it creates XML (AML) import files of ARIS Business Architect / ARIS UML Designer.

Platform: The TOOLBUS Interface for ARIS and Rational Rose requires Microsoft Windows 2000/XP/Vista. The interface supports ARIS Business Architect, ARIS UML Designer and the ARIS Toolset 6.2, 7.0 and 7.1, and Rational Rose 2000, 2000e, 2001, 2001A, 2002 and 2003.
