## **TOOLBUS Interface for COOL:Biz and ER/Studio Version 1**

### **Data Sheet**

(effective December 2004)

The TOOLBUS Interface for **COOL:Biz** and **ER/Studio** enables the conversion of Entity-Relationship Data Models and Database Schemas from COOL:Biz to Logical and Physical Data Models for ER/Studio:

- Entity-Relationship Models (Entities, Attributes, Relationships, Domains) can be converted from COOL:Biz to ER/Studio, and the layout of the Entity-Relationship Diagrams is maintained.
- Database Schemas (Tables, Columns, Foreign Keys, etc.) can be converted from COOL:Biz to ER/Studio, and the layout of the Database Schema Diagrams is maintained.
- The maps from Physical to Logical Models (Tables to Entities, Columns to Attributes, Foreign Keys to Relationships) are established in ER/Studio.

### **Migration Process:**

In order to convert a model from COOL:Biz to ER/Studio, the COOL:Biz model must be saved as a BML file, from which the TOOLBUS Interface creates a DM1 file for ER/Studio.

### **Platform:**

The TOOLBUS Interface for COOL:Biz and ER/Studio requires Microsoft Windows NT/2000/XP. It supports COOL:Biz 4.0, 4.1, 5.0 and 5.1, and ER/Studio 6.5 and 6.6.

- **About RI:** Founded in 1983, *Reischmann Informatik GmbH (RI)* is specialized in supplying interfaces for the model conversion between CASE tools, based on its **TOOLBUS™** technology. TOOLBUS currently supports more than 30 CASE tools and repositories, and more than 200 companies worldwide have used TOOLBUS interfaces to migrate their models.
