TOOLBUS Interface for COOL:Biz and PowerDesigner

Version 1

Data Sheet

(effective June 2005)

The TOOLBUS Interface for **COOL:Biz** and **PowerDesigner** enables the conversion of Entity-Relationship Diagrams and Database Schema Diagrams from COOL:Biz to Conceptual Data Models (CDM) and Physical Data Models (PDM) in PowerDesigner.

Migration Process:

In order to migrate a model from COOL:Biz to PowerDesigner the COOL:Biz model is exported into a BML file, which is transformed to a TOOLBUS File. The TOOLBUS programs generate (XML) CDM and (XML) PDM files for PowerDesigner from the intermediate TOOLBUS file.

Platform:

The TOOLBUS Interface for COOL:Biz and PowerDesigner requires Microsoft Windows NT/2000/XP. It supports COOL:Biz releases 3.2, 4.0, 4.1, 5.0 and 5.1, and PowerDesigner versions 10 and 11.
