Data Sheet

(effective February 2009)

The TOOLBUS™: ER/Studio® DM1 File Exporter for Rational® Software Modeler enables the export of UML Class Diagrams from the IBM Rational Software Modeler (RSM), Rational Software Architect (RSA) and Rational Systems Developer (RSD) to an ER/Studio model file (.dm1 file), where the UML Class Diagrams have been converted to Logical Data Models.

UML Classes, Associations and Attributes from RSM/RSA/RSD are converted to Entities, Relationships and Attributes for ER/Studio with their properties and documentation.

The layout of the UML Class Diagrams from RSM, RSA and RSD is maintained for the Data Models in ER/Studio.

Interface Technology: The ER/Studio DM1 File Exporter for Rational Software Modeler uses the Eclipse Modeling Framework (EMF) to export UML Class Diagrams from Rational Software Modeler, Rational Software Architect and Rational Systems Developer, and it generates DM1 model files for ER/Studio.

Platform: The ER/Studio Data Model Exporter for Rational Software Modeler supports Rational Software Modeler, Rational Software Architect and Rational Systems Developer versions 7.0 and 7.5, and ER/Studio versions 7.x and 8.0.

Trademarks:

ER/Studio is a registered trademark of Embarcadero Technologies, Inc. in the United States, other countries, or both.

Rational is a registered trademark of International Business Machines Corporation in the United States, other countries, or both.

TOOLBUS is a trademark of Reischmann Informatik GmbH in the United States, and other countries.
