**Data Sheet**

(effective October 2006)

The TOOLBUS™: AllFusion® ERwin® Data Modeler XML File Exporter for Rational® Data Architect LDM enables the export of Logical Data Models from IBM Rational Data Architect (RDA) to Logical Models for AllFusion ERwin.

Entities, Relationships, Subtypes, Attributes and Domains are converted from RDA to AllFusion Erwin with their properties and documentation, and the layout of the Logical Data Model diagrams from RDA is maintained in the Subject Areas for AllFusion ERwin (including colors).

**Interface Technology:** The AllFusion ERwin Data Modeler XML File Exporter for Rational Data Architect uses the Eclipse Modeling Framework (EMF) to read Logical Data Models (ldm files) from Rational Data Architect, and it generates XML import files for AllFusion ERwin.

**Platform:** The AllFusion ERwin Data Modeler XML File Exporter for Rational Data Architect supports AllFusion ERwin Data Modeler 4.0, 4.1, 4.1.4, 7.0 and 7.1, and IBM Rational Data Architect 6.1.

**Trademarks:**

TOOLBUS is a trademark of Reischmann Informatik GmbH in the United States, other countries, or both.

Rational is a trademark of International Business Machines Corporation in the United States, other countries, or both.

AllFusion and ERwin are trademarks of Computer Associates Corporation in the United States, other countries, or both.
