Data Sheet

(effective October 2006)

The TOOLBUS™: AllFusion® ERwin® Data Modeler XML File Importer for Rational® Data Architect LDM enables the import of Logical Models from AllFusion ERwin into Logical Data Models in IBM Rational Data Architect (RDA).

Entities, Relationships, Subtypes, Attributes and Domains are migrated from AllFusion Erwin to Logical Data Models (ldm files) for RDA with their properties and documentation, and the layout of the Subject Areas from AllFusion ERwin is maintained in the Logical Data Model diagrams converted for RDA (including colors).

The AllFusion ERwin XML File Importer also supports the creation of Domain Models (ddm files) in RDA.

Interface Technology: The AllFusion ERwin Data Modeler XML File Importer for Rational Data Architect parses the XML export files from AllFusion ERwin, and it uses the Eclipse Modeling Framework (EMF) to create Logical Data Models in Rational Data Architect.

Platform: The AllFusion ERwin Data Modeler XML File Importer for Rational Data Architect supports AllFusion ERwin Data Modeler 4.0, 4.1, 4.1.4, 7.0 and 7.1, and IBM Rational Data Architect 6.1.

Trademarks:

TOOLBUS is a trademark of Reischmann Informatik GmbH in the United States, other countries, or both.

Rational is a trademark of International Business Machines Corporation in the United States, other countries, or both.

AllFusion and ERwin are trademarks of Computer Associates Corporation in the United States, other countries, or both.
