Data Sheet

(effective February 2011)

The ARIS XML File Importer for Rational Software Architect enables the import of UML Diagrams from ARIS Business Architect and ARIS UML Designer into UML Models in IBM Rational Software Architect (RSA), Software Modeler (RSM), and Systems Developer (RSD).

UML Diagrams imported from ARIS:

- UML Activity Diagrams
- UML Class Diagrams
- UML Collaboration Diagrams (UML Communication Diagrams)
- UML Component Diagrams
- UML Sequence Diagrams
- UML State Chart Diagrams (UML State Machine Diagrams)
- UML Use Case Diagrams

In addition, extended Event-Process Chains (eEPC) from ARIS Business Architect can be converted to UML Activity Diagrams for RSA, RSM and RSD.

Interface Technology: The TOOLBUS Importer parses XML export files from ARIS (AML files), and it uses the Eclipse Modeling Framework (EMF) to create UML models in RSA/RSM/RSD.

Platform: The ARIS Toolset XML File Importer for Rational Software Architect requires Microsoft Windows 2000/XP/Vista/7. The TOOLBUS interface supports ARIS Business Architect and ARIS UML Designer versions 7.0 and 7.1, and IBM Rational Software Architect (RSA), Rational Software Modeler (RSM) and Rational Systems Developer (RSD) versions 7.0, 7.5 and 8.0.
