Data Sheet

(effective September 2010)

The ARIS XML File Exporter for Rational Software Modeler enables the export of

- UML Activity Diagrams,
- UML Class Diagrams,
- UML Collaboration Diagrams,
- UML Component Diagrams,
- UML Sequence Diagrams,
- UML State Machine Diagrams (UML State Chart Diagrams) and
- UML Use Case Diagrams

from IBM Rational Software Modeler (RSM), Rational Software Architect (RSA) and Rational Systems Developer (RSD) to XML import files (AML Files) for ARIS Business Architect and ARIS UML Designer, and to other ARIS products, which include ARIS Business Architect or ARIS UML Designer functionality.

The UML diagrams from RSM/RSA/RSD and the contained UML objects are converted for ARIS UML diagrams with their properties and documentation. The layout of the UML diagrams from RSM, RSA and RSD is maintained in the UML diagrams in ARIS.

Interface Technology: The ARIS UML Designer Exporter for Rational Software Modeler uses the Eclipse Modeling Framework (EMF) to export UML diagrams from Rational Software Modeler, Rational Software Architect and Rational Systems Developer, and it generates XML (AML) import files for ARIS UML Designer.

Platform: The ARIS XML File Exporter for Rational Software Modeler supports IBM Rational Software Modeler, Software Architect and Systems Developer versions 7.0 and 7.5, and ARIS Business Architect and ARIS UML Designer versions 7.0 and 7.1.

Trademarks:

ARIS is a trademark or registered trademark of IDS Scheer AG in the United States, other countries, or both.

Rational is a registered trademark of International Business Machines Corporation in the United States, other countries, or both.

TOOLBUS is a trademark or registered trademark of Reischmann Informatik GmbH in the United States, other countries, or both.
