Data Sheet

(effective May 2010)

The ARIS XML File Importer for Rational Software Modeler enables the import of UML Diagrams from ARIS Business Modeler and ARIS UML Designer into UML Models into IBM Rational Software Modeler (RSM), Software Architect (RSA), and Systems Developer RSD).

UML Diagrams imported from ARIS:

- UML Activity Diagrams
- UML Class Diagrams
- UML Collaboration Diagrams (UML Communication Diagrams)
- UML Component Diagrams
- UML Sequence Diagrams
- UML State Chart Diagrams (UML State Machine Diagrams)
- UML Use Case Diagrams

In addition, extended Event-Process Chains (eEPC) from ARIS Business Architect and from the ARIS Toolset can be converted to UML Activity Diagrams for RSM, RSA and RSD.

Interface Technology: The TOOLBUS Importer parses XML export files from ARIS (AML files), and it uses the Eclipse Modeling Framework (EMF) to create UML models in RSM/RSA/RSD.

Platform: The ARIS Toolset XML File Importer for Rational Software Modeler requires Microsoft Windows 2000/XP/Vista/7. The TOOLBUS interface supports ARIS versions 6.2, 7.0 and 7.1, and IBM Rational Software Modeler (RSM) / Rational Software Architect (RSA) / Rational Systems Developer (RSD) versions 7.0 and 7.5.
