Data Sheet

(effective February 2009)

The IBM Telelogic System Architect Importer for IBM Rational Software Modeler enables the import of

- UML Activity Diagrams
- UML Class Diagrams
- UML Collaboration Diagrams (UML Communication Diagrams)
- UML Component Diagrams
- UML Deployment Diagrams
- UML Sequence Diagrams
- UML State Chart Diagrams (UML State Machine Diagrams)
- UML Use Case Diagrams

from IBM Telelogic System Architect into UML Models in IBM Rational Software Modeler (RSM), Software Architect (RSA), and Systems Developer (RSD).

The diagram appearance of the System Architect UML diagrams is maintained in RSM/RSA/RSD for all UML diagrams.

All UML diagrams contained in a System Architect encyclopedia are imported into RSM/RSA/RSD in one import run.

Interface Technology: The Telelogic System Architect Importer for Rational Software Modeler reads System Architect Encyclopedias using the API functions of System Architect, and it uses the Eclipse Modeling Framework (EMF) to create UML models in RSM/RSA/RSD.

Platform: The Telelogic System Architect Importer for Rational Software Modeler requires Microsoft Windows 2000/XP/Vista. The interface supports IBM Telelogic System Architect versions 9, 10 and 11, and IBM Rational Software Modeler (RSM) / Rational Software Architect (RSA) / Rational Systems Developer (RSD) versions 7.0 and 7.5.
